

Enrolment

All students wishing to apply must be referred by one of the following agents*:

- Department of Justice
- Western Australia Police Force
- Department of Education
- Other nominated agencies

The application process will include a visit by the student with their referring agent to Rockingham PCYC where they will receive a guided tour of the facilities and will complete their student enrolment paperwork for the course.

All applications will then be reviewed and the applicants will be notified of their placement within the program.

If you are unsure whether you can be referred by one of the listed agencies, please call Rockingham PCYC directly and they will help you through the process.

* Agency referrals are not required for students who identify as Aboriginal or Torres Strait Islander.

No fees for the student

Recruitment, student enrolment, fees and charges are undertaken by Rockingham PCYC.

Training qualifications are handled by South Metropolitan TAFE.

In partnership with

**weld to
LIFE**

This qualification is intended for students interested in gaining exposure to an engineering or a related working environment.

Course duration:
Monday to Thursday
over 12 weeks

Students will develop trade skills and knowledge in engineering and manufacturing which will enhance their employment prospects for apprenticeships, traineeships or general employment in an engineering-related workplace.

Students will work with engineering tools and equipment to produce or modify objects in a safe and effective manner.

Operate hand tools/
power tools

Operate workshop
machines

Operate welding
machines

Solder

Work in a team

Apply principles of
Health and Safety

Plan your career

SUCCESS STORY

Linda is one of the students in the Weld to Life course.

She has been home-schooled most of her life and chose to engage in courses here at PCYC to experience study with people her age.

She started the Automotive I course and is now excelling in welding and fabrication, being picked by her trainer as the tidiest welder in her cohort.

With Rockingham PCYC's support Linda has been able to start work experience at a one of WA's largest ship building companies, and her future goal is to become a welder.

Linda is a great role model and will be the first female to pass our Weld to Life course.

Project:

Throughout the 12 week Engineering course, students will be involved in project work.

Participants are provided with:

- ✓ Breakfast and lunch every day
